

# RECYCLING CENTER

eco-NAN PROJECT SCHEME

October 2017

We believe in man's ability to assume the responsibility of maintaining the ecosystem balance on our planet. Part of our mission is to investigate and develop innovative systems to create green technology for the industrial interprice in order to boost the Natural Capital growth. We promote, support and apply our project in the industrial fields. We contribute to feedforward an eco-sustainable economic system based on new tech technology, responsibility, cooperation and consensus.

*For a resilient economy*
